

College Blogging Website - Simplified Project Planning Document

 **Project Name:** UUConnect (Simplified Version)

A lightweight blogging and announcement platform for Uttaranchal University students using only basic web technologies. Focuses on core features and is designed specifically for **local system execution using XAMPP/LAMP**, not for online cloud platforms like Replit.

Project Summary

A simplified blog and feedback portal where:

- Students can post blogs with media (image/video)
 - Submit anonymous complaints with optional attachments
 - Review college services and experiences with rating + comment
 - Admins can manage blogs, complaints, announcements, and users
 - Users can like and comment on blogs
 - Filter blogs by category and search titles
 - View event calendar with upcoming college activities
 - Participate in a student-driven **Skill Sharing Board, Ask Senior Q&A, Mental Health Corner**, and an **Opportunities Board**
-

Website Modules/Pages (Updated)

Home Page

- Welcome message and branding
- Trending Blogs section (based on likes)
- Featured announcements section
- Quick links to: Blogs, Announcements, Reviews, Complaints
- Shortcuts to new social-impact sections (Skills, Q&A, Mental Health, Jobs)
- Search bar for blogs (basic JS filter)
- Dark mode toggle

Opportunities Board

- Students, seniors, and faculty can post internship, job, and freelance opportunities
- Posts have title, category, description, optional deadline/date, and poster's name
- Users can comment to ask questions

Ask Senior / Q&A Forum

- Juniors can post questions related to college life, courses, internships, projects, etc.
- Seniors or peers can reply with answers
- Threads are stored with tags and timestamps

Skill Sharing Hub

- Students can post what skills they can teach (e.g., Photoshop, Python) or request help
- Posts have a "Looking for Help / Offering Help" toggle
- Contact via in-app message or comment thread

Mental Health Corner

- Anonymous motivational stories, struggles, tips shared by students
- Optional comment & like feature
- Display helpline or college counselor info

Announcements

- Latest college events, updates, and fests
- Admin can post new announcements
- Calendar integration for event dates

Blogs

- Add new blog (title, content, category, image/video upload)
- View all blogs with like/comment system
- Filter by category (Achievements, Events, Projects, etc.)
- Sort by Trending / Newest
- Search by title
- Comment system with optional nested replies

Complaints/Suggestions

- Anonymous complaint submission form
- Dropdown selector for complaint type
- File upload support for evidence
- Admin panel to view/manage complaints

Reviews/Feedback

- Rate services from 1–5 stars
- Select category
- Comment with optional image upload
- Upvote helpful reviews

Login/Profile

- Login via username/password
- View/update user profile
- User's blogs, questions, answers, skills, etc.

Admin Panel

- Admin login with role check
- Manage all content: blogs, complaints, announcements, mental health posts, Q&A
- Approve, delete, and promote posts

Calendar View

- Monthly view of announcements/events
- Click date to view details

Core Features Summary (Updated)

Additional Database Tables

opportunities

```
id INT AUTO_INCREMENT PRIMARY KEY
title VARCHAR(100)
description TEXT
posted_by VARCHAR(100)
deadline DATE
category VARCHAR(50)
timestamp DATETIME
```

qna_threads

```
id INT AUTO_INCREMENT PRIMARY KEY
user_id INT
question TEXT
tags VARCHAR(100)
timestamp DATETIME
```

qna_replies

```
id INT AUTO_INCREMENT PRIMARY KEY
thread_id INT
user_id INT
answer TEXT
timestamp DATETIME
```

skills

```
id INT AUTO_INCREMENT PRIMARY KEY
user_id INT
is_help_request BOOLEAN
skill_title VARCHAR(100)
description TEXT
timestamp DATETIME
```

mental_posts

```
id INT AUTO_INCREMENT PRIMARY KEY
user_id INT (optional)
content TEXT
is_anonymous BOOLEAN
likes INT DEFAULT 0
timestamp DATETIME
```

The remaining sections and structure (login, reviews, blogs, admin, etc.) remain unchanged and fully functional.

Would you like me to begin generating the updated `.sql` script and starter files for these new modules?
